Emne: AmSECT International Days call for presenters

International Perfusion Peers, Partners, Societies and Associations

AmSECT, the American Society of ExtraCorporeal Technology, will be hosting its 65th ***AmSECT*** International Perfusion Conference in Nashville, Tennessee this coming March of 2027 (https://amsect.org/events-education/international-conference)

AmSECT and the International Consortium for Evidence-Based Perfusion (ICEBP) have long maintained a goal to strengthen the international relationships throughout the global perfusion community. To support that goal, the 2027 conference will once again host its annual International Days pre-conference virtual webinar.

AmSECT plans to host **2** web-based sessions with speakers representing countries from around the world. We are searching for **20** volunteers who would be interested in speaking.

Date and Time:

- 2:00–4:00 PM Eastern Standard Time/ New York time (EST) on Wednesday March 24th and
- 5:00–7:00 PM EST on Thursday March 25th

Duration:

- ~Two hours, with the possibility of extending the program based on speaker availability and participation.

Post-webinar Q&A: Following the webinar, speakers (or their representatives) will be asked to participate in live Q&A. Each speaker will be asked to submit 5 questions and answers, relevant to their presentation, for use by moderators and coordinators. Given the restrictions of some time zones, submitted Q&A may be used in lieu of live attendance by the moderators at the request of the presenter.

This is a great opportunity to build international relationships, present your research or a topic to an international audience, and validate our profession.
All presentations must be:

- 10-15 minutes long
- pre-recorded
- in English
- on a subject that supports cardiovascular perfusionists

All speakers will receive free VIRTUAL ATTENDANCE to the entire 2027 ***AmSECT***International Conference.

We are asking for your support. If your society would like to participate, or if you know any interested perfusionists , please reply at your earliest convenience.

The deadline for volunteers is **December 31st, 2026**.
The deadline for presentations is **January 30th, 2026.**

It's through collaborations and support that perfusion can advance! We are eager to hear from you as we continue to build our profession on a global platform.

Thank you so much for your time; we look forward to your response.

- Dafne Andrea Chianella, Scott Snider, and Molly Oldeen
